London, UK | +44 7380 729840 | Choudhary.ume3001@gmail.com | linkedin.com/in/ume-choudhary | SC clearance eligible

PROFESSIONAL PROFILE

People Operations and HR transformation consultant with 8+ years across HR, legal, compliance and employee-service operations, including Amazon and Capgemini Invent. Trusted partner to senior leaders, Product Owners and cross-functional HR stakeholders across Talent Acquisition, Performance Management, Rewards, Global Mobility and Payroll, translating people priorities into scalable processes, controls, service models and employee experiences. Delivered 10+ end-to-end transformations across EMEA, North America, Latin America and APAC, including a global programme spanning 70+ countries. Brings high-volume operational experience, early risk identification and escalation governance, manager/stakeholder enablement, change adoption and data-driven performance reporting. UK-based with an LLB (Hons) legal foundation and hands-on HR/legal/compliance operations experience.

PEOPLE CONSULTING & HR OPERATIONS EXPERIENCE

People Partnering & Manager Enablement: Senior stakeholder and Product Owner partnering; performance-management, rewards, talent, mobility and payroll process engagement; workshop facilitation; training, SOPs, knowledge content and change adoption.

Operational People Risk & Compliance: Early risk identification; escalation paths; approval hierarchies; governance controls; legal/compliance workflows; RAID management; business readiness; risk and performance reporting.

Employee Experience & HR Operations: HR service delivery; employee request and case management; onboarding; intake, routing, approvals and SLAs; Employee Center; knowledge management; service transparency and employee journeys.

High-Volume / Site-Adjacent Operations: Amazon experience across HR, Facilities, Legal, Compliance and IT; workplace/facilities service delivery; complex cross-functional operations; multi-region enterprise delivery.

Data-Driven Decisions: KPI, adoption, performance and risk reporting; operational dashboards; service metrics; process analysis; evidence-led prioritisation and continuous improvement.

QUANTIFIED PEOPLE & BUSINESS IMPACT

- Improved case resolution by 35% and onboarding efficiency by 40% by redesigning service workflows, employee journeys, approvals, SLAs and governance.
- Delivered up to 40% process improvement and 200+ hours of annual productivity savings through workflow automation across HR, Legal, IT, Finance and Audit operations.
- Converted 20+ discovery and design workshops into validated people-process requirements, prioritised backlogs, solution options and transformation roadmaps.
- Delivered 10+ end-to-end enterprise transformations across EMEA, North America, Latin America and APAC, with programmes spanning 70+ countries.
- Helped secure two competitive bid wins, including an HRSD/CSM deployment valued at approximately £900k+, by shaping service-design narratives, value cases and executive materials.

PROFESSIONAL EXPERIENCE

Senior Consultant - Capgemini Invent | Jan 2026 - Present

- Lead end-to-end HR service transformation within a 5+ workstream global programme spanning 70+ countries and 10+ integrations, aligning cross-functional people-process requirements with scalable service design.
- Partner with stakeholders across Talent Acquisition, Performance Management, Rewards, Global Mobility, Payroll and Legal to diagnose current-state issues, clarify people priorities and define future-state operating processes.
- Facilitate discovery and requirements workshops with business stakeholders and Product Owners, converting priorities into process flows, functional requirements, user stories, acceptance criteria and implementation roadmaps.
- Own cross-workstream RAID governance, driving actions and decisions to identify and mitigate delivery and operational risks early; coordinate Workday integration dependencies and go-live readiness.
- Advise senior stakeholders and C-suite executives on employee-service capabilities and business value, including HRSD, EmployeeWorks, Employee Slate and conversational employee intake.
- Manage and guide a 5+ member onshore/offshore team through build, testing, validation and deployment, providing functional direction and maintaining clarity of priorities and decisions.

Solution Delivery Lead - CT Global - B2B SaaS & Client Services | Aug 2023 - Dec 2025

- Led people-service and enterprise workflow transformation across HR, Legal, IT, Audit and Finance, coordinating 10+ client SMEs, delivery resources and third parties in a blended operating model.
- Ran 20+ cross-functional discovery and design workshops, diagnosing current-state pain points, defining future-state processes and presenting solution options, risks and mitigations for Product Owner decisions.
- Improved case resolution by 35% and onboarding efficiency by 40% by defining service catalogue structures, intake, approvals, SLAs, escalation paths, governance and user journey flows.
- Established structured case-management operating models for new functions from a standing start, defining scope, intake routes, approval hierarchies, service levels, escalation routes, controls and reporting.
- Used KPI, adoption, performance and risk reporting to support evidence-led prioritisation and continuous improvement, strengthening visibility for business and Product Owner stakeholders.
- Supported business readiness, stakeholder training and change adoption through process maps, SOPs, implementation roadmaps, training materials and knowledge content for business and technical audiences.

Solution Delivery Consultant - Amazon | Jun 2021 - Jul 2023

- Delivered workflow and case-management transformation across five operational functions - HR, Facilities, Legal, Compliance and IT - in a high-volume environment, supporting iterative releases across request intake, approvals, case handling and service management.

- Assessed current-state operational pain points and designed scalable future-state processes covering service catalogue, employee/service requests, routing, approvals, escalation logic and governance.
- Extended service-management capability into workplace and Facilities operations, defining service scope, intake, approvals, SLAs and governance from a standing start.
- Led Legal Service Delivery and compliance workflow implementation to strengthen control, traceability and consistency across contract, request, approval and governance processes.
- Acted as functional liaison between operational stakeholders and technical delivery teams, resolving ambiguity, clarifying requirements and supporting UAT, defect triage, business validation and deployment readiness.
- Produced SOPs, process maps, training and knowledge content and provided post-go-live hypercare, supporting adoption across operational stakeholder groups.
- Supported Agile sprint planning, backlog prioritisation and iterative releases, translating operational service challenges into prioritised backlog items and clear acceptance criteria.

HR & Legal Operations Consultant & Project Specialist - Paget Property | Jul 2017 - Jun 2021

- Digitised HR, legal and compliance operations by replacing manual processes with structured workflows across employee requests, legal enquiries and matter tracking, improving control, consistency and visibility.
- Partnered directly with business owners, employees and suppliers to capture operational needs and translate them into process maps, controls, approval workflows, SOPs and training materials.
- Built request forms, approval workflows and operational dashboards using SharePoint, Power Automate, Microsoft Forms, Excel and Teams, improving service transparency and management information.
- Defined documented escalation paths, governance controls and repeatable service processes across HR/legal operations, strengthening compliance-focused delivery and issue handling.
- Created practical training and process documentation to support consistent adoption of new HR/legal workflows by business users and service stakeholders.

OPERATIONAL TRANSFORMATION PORTFOLIO

- **HR service delivery:** Designed and governed HRSD and employee-service workflows spanning onboarding, employee requests, case management, knowledge, self-service, approvals, SLAs and employee journeys.
- **Workplace & Facilities:** Extended service delivery into workplace/Facilities operations, defining service scope, intake, approvals, SLAs and governance from a standing start.
- **Legal & compliance:** Implemented structured legal and compliance workflows for contract, request, approval and governance processes, strengthening control and traceability.
- **Finance & Audit:** Established case-management operating models for new functions, defining intake, approval hierarchies, escalation routes, service levels, workflow controls and reporting.

PEOPLE OPERATIONS DELIVERY TOOLKIT

People processes: Talent Acquisition; Performance Management; Rewards; Global Mobility; Payroll; onboarding; HR service delivery; employee requests; case management; knowledge and employee self-service.
